

Are Your Hearing Devices Performing at Their Best? Let's Find Out!

RSVP now for a complimentary Hearing Device
Performance Check! 123.456.7890

Dear Patient,

We hope this message finds you and your loved ones well. We're reaching out because your hearing aids play such an important role in helping you stay connected. With everyday use, it's natural for them to experience some wear and tear. While daily care goes a long way, hearing aids have delicate parts that can sometimes collect moisture or debris. Regular check-ins help keep them working at their best so you continue to hear clearly.

That's why we'd love to see you for a **complimentary Hearing Device Performance Check**. During this visit, we'll take the time to make sure your devices are working their very best and give you added peace of mind.

At your complimentary appointment, our team will:

- **Check performance:** Using a specialized device known as a Test Box, we'll see if your hearing aids are giving you the right volume, clarity, and direction, so you can enjoy conversations with confidence.
- **Remove moisture:** We'll give your devices a Redux Treatment, a safe system that completely removes any trapped moisture and helps prevent future problems.
- **Catch hidden issues:** We'll look for small problems that can build up over time and quietly affect your hearing.
- **Offer support:** We'll answer your questions and share simple tips to help you keep your hearing aids working their best.

Our goal is simple: to help you keep your hearing devices performing their best all year long. Call us today at 123.456.7890 to reserve your **complimentary Hearing Device Performance Check**.

Thank you for trusting us with your hearing health. We can't wait to see you!

Warm regards,
Your Dedicated Hearing Care Team
